

Our STP Property Wrap

AXON Stock Throughput Property Wrap

Axon's Stock Throughput (STP) Property Wrap is a one of a kind property program providing coverage for real, personal and business interruption.

One hurdle retailers face when placing Stock Throughput (STP), is negotiating with property carriers an equitable reduction in premium when stock is removed. In many instances, the property underwriters are unwilling to provide reductions commensurate with deleted values, thus making the STP option uncompetitive. Additionally, brokers may be unable to provide options for the real and personal property to compliment STP proposals.

With this in mind, AXON developed our property wrap program to provide coverage for real, personal and business interruption to complement our STAPLE program. As with STAPLE, we believe this is a first of its kind policy for this specific need.

Key Features
